1. The Tosmare Ship Yard is located on the Baltic Sea coast northwest of the city of Liepaja. All of the installations and departments are located in one area.

See accompanying sketch, Enclosure (A),

2. During the time that I spent in Liapaja I saw no new ship construction, only repair work on old ships. Under the Soviet occupation all available Latvian Government material was used for repair work before additional stock was brought in from the USSR.

- 3. I cannot give the actual capacity of the dry docks (one floating dock and two dry docks). I do know that these dry docks could and did handle battleships
- 4. All departments in the Tosmare Ship Yard were responsible to the Baltic Soviet fleet command.
- 5. Unusual cargo-handling equipment included a 40-ton floating crans and a presumatic grain-loading device.

- end -
